EDUCATION

The University of Texas at Austin, Austin, TX
Bachelor of Science in Informatics; focus areas in Human-Centered Data Science and Cybersecurity
Working toward Computer Science Certificate

Expected May 2029

EXPERIENCE

Tech Director & Co Vice Director, Business Oversight & Analytics, Sustainable Building Initiative, UT Austin *Aug 2026 to Present*

- Hold two concurrent leadership roles spanning technology and business: Tech Director and Co Vice Director for Business Oversight and Analytics.
- Lead a 10 to 15 person tech team and serve as primary technical point of contact for client-facing communication, running recruiting, interviews, and onboarding for new members.
- As Co Vice Director for Business Oversight and Analytics, partnering with leadership on operational oversight, performance tracking, and data-driven analysis that informs club strategy and resource decisions.

Founder, Perspect (tryperspect.com) *2026 to Present*

- Designed, built, and shipped a full-stack AI product solo (backend, frontend, infrastructure, brand) where a panel of expert AI personas debates a topic and outputs a structured briefing with cited sources; originated at the Claude Hackathon 2026 (top-20 finish).
- Ran a first classroom beta with real student users, pitched to a diverse mix of students, educators, and testers, and self-funded a Gemini spend guard with monthly budget alerts.
- Presented Perspect at the HC4A hackathon orientation to strong reception; product now in closed-beta iteration.

ESG Consulting Intern, ICELIS Global, Remote to Doha, Qatar *Jun 2026 to Jul 2026*

- Completed a four-week internship with the ESG consulting team focused on IFRS S1 and S2, GRI Standards, and the GCC regulatory landscape (QFMA, ADX, CBB, FSA, and the regional CMAs).
- Built Module 1 "Standards Landscape" (26 slides on IFRS S1/S2 with a GCC regulatory map) and Module 2 "Running a Materiality Assessment" (22-slide workshop playbook with templates, scoring rubrics, an 8-week engagement plan, and GCC-specific add-on topics) as the foundation of a reusable client training series.
- Delivered ~90 slides of consultant-ready material plus reference matrices spanning an IFRS vs GRI comparison, a six-step reporting process guide, and a full GCC regulatory scan.
- Presented a final internship recap to leadership with four strategic proposals (monthly GCC regulator update tracker, client intake questionnaire, reusable training module library, AI agent for first-touch client scoping); received a letter of recommendation signed by the Founder & CEO.

Tech Lead, Drone Road-Inspection Research, SBI x UT Austin, Austin, TX *May 2026 to Present*

- Lead the technical side of a ~10 person research team using drone imagery and computer vision to detect road cracks and stitch them into a continuous georeferenced road map
- Authored the research brief setting technical direction across detection and stitching, then split the team into two sub-teams and set the data-collection strategy

Software Engineering Intern, BizFirst AI, Remote *Jun 2026 to Present*

- Building infrastructure and AI tooling on an enterprise workflow platform: self-hosted MinIO object storage on Docker with restic snapshots to Backblaze B2, POSIX shell disk-monitoring scripts, and three MCP tools that let a multi-agent orchestrator generate valid form schemas from natural-language prompts.
- Contributing to StorageStudio (open-source React UI for object storage) and an Accumulate blockchain integration in C#/.NET.

Tech Lead, HC4A 9/11 Day of Service Hackathon, Austin, TX *Jul 2026 to Present*

- Co-leading technology and student-council operations for Hindu Charities for America's "AI with All" hackathon targeting ~600 participants (grades 8-12), coordinating with a data scientist and an AI/UX designer on a one-month build timeline.
- Helping recruit and structure the student council team and project-management processes.

DATA ANALYTICS

Data Analyst, Global Career Accelerator (UT Austin / Podium Education) *2026*

- **Intel Data Center (capstone, 200 pts)**: Analyzed 4M+ rows of hourly U.S. energy-generation data in Tableau to recommend a region for a new data center, building calculated fields, a parameter-driven dual-axis time series, a tree map, and an interactive dashboard comparing regional net production, renewable share, and generation by source; recommended the Northwest on surplus capacity plus a 52% renewable mix.
- **The Grammys (capstone, scored 220/200)**: Used advanced Excel (PivotTables, SUMIFS/AVERAGEIFS, XLOOKUP, nested IF logic) to compute engagement KPIs and mobile-visitor rates and assess the business impact of the 2022 Grammy.com and RecordingAcademy.com website split, delivering a stakeholder recommendation memo.
- Completed 14+ analytics milestones across Excel and Tableau and ran A/B tests with statistical-significance analysis, driving data-backed recommendations across entertainment, transit, sports, music, and e-commerce datasets.

SKILLS

Data & analytics: Tableau (calculated fields, table calculations, parameters, dashboards, tree maps, maps), Excel (PivotTables, XLOOKUP, SUMIFS/AVERAGEIFS), A/B testing and statistical significance, KPI analysis, data visualization

Business & consulting: strategy, product management, client presentations, cross-functional leadership, sustainability frameworks (IFRS S1/S2, GRI, ERS), materiality assessment methodology, GCC regulatory landscape

Technical: Python, TypeScript, JavaScript, C#/.NET, SQL, React, Next.js, FastAPI, Docker, Kubernetes, PostgreSQL, Supabase, MCP tools, LLM app development

Tools: Figma, PowerPoint, Google Workspace, GitHub, Vercel, Render, MinIO, Notion

LEADERSHIP & CERTIFICATIONS

Founder, Blood Buddy (consumer product, 8,000+ donors); National Cyber Scholar (National Cyber Scholarship Foundation); SANS Foundations + GIAC Certification; CyberPatriot State Semi-Finalist; Robotics Team Captain; Code2College program participant; Violin, 6 years
